

Date: November 4, 1986
To : recipients of EISCAT result tapes
From : Peter Collis

Tapes A860813 and A860923 are on their way to you under separate cover.
These tapes contain results from the following experiments (all 1986) :

CP-1-F August 12/13 (08-08 UT)	
CP-3-E August 27/28 (08-22 UT)	A860813
CP-1-F September 2/3 (08-11 UT)	

CP-3-E September 23/26 (13-24 UT)	A860923
-----------------------------------	---------

Enclosed are plots of transmitted power and system temperature during these experiments.
Please note that the power profile results from the CP-2-C experiment on May 21/22 this year are distorted between 1442 and 0620 UT. These results are on tape A860506 which was mailed in September. A crowbar at 1442 corrupted the reception of the power profile data and this was only rectified following another crowbar at 0619 UT on the next day.
